PROFILE

AI/ML Engineer specializing in large language model fine-tuning, Dravidian natural language processing, and real-time data streaming architectures. Proven track record of architecting scalable AI pipelines, multi-agent systems, and deploying optimized intelligence solutions from conceptualization to production.

EDUCATION

Amrita Vishwa Vidyapeetham <i>B.Tech in Computer Science Engineering (AI) — CGPA: 7.72</i>	<i>2023 – Present</i> <i>Coimbatore</i>
St. Jude Public School <i>Higher Secondary Education (Computer Science) — 86%</i>	<i>2021 – 2023</i> <i>Thrissur</i>

SKILLS

Programming Languages: Python, Scala, SQL, Java, C

AI & Machine Learning: Deep Learning, NLP, TensorFlow, Keras, Scikit-Learn, Multi-Agent Systems

Data & Streaming: Apache Spark, Kafka, HDFS, Pandas, NumPy

MLOps & Deployment: Docker, Git, GitHub, Microsoft Azure, FastAPI

AI Tools: LangChain, Hugging Face, OpenAI API

EXPERIENCE

Paramount Computer Systems <i>Artificial Intelligence Engineer Intern</i>	Hybrid <i>Apr 2026 – Present</i>
- Engineered and debugged core AI module pipelines within an Agile SCRUM environment, executing rigorous end-to-end UAT testing to minimize deployment bug frequency. - Architected and documented scalable codebase components for internal enterprise systems, optimizing API query response times and overall system latency.	
Cycrew <i>AI Intern — Security Intelligence</i>	Remote <i>Oct 2025 – Jan 2026</i>
- Fine-tuned large language models utilizing Ollama, Hugging Face, and LangChain, achieving a 35% improvement in threat detection accuracy. - Analyzed 5,000+ security logs to extract actionable intelligence, reducing manual incident triage time by 25%. - Automated LLM-driven threat intelligence extraction for phishing and MFA abuse logs, significantly accelerating security report generation across high-volume monthly incidents.	

PROJECTS

Real-Time Tech Sentiment Pipeline — Engineered a social media intelligence platform utilizing Apache Spark Structured Streaming, Kafka, and RoBERTa to process high-velocity data streams and extract real-time sentiment analytics.

CareSyncOS — Built a full-stack hospital OS managing **500+** patient records with AI-driven EHR automation, LLM-powered health coaching, and intelligent medical record summarization.

Materials-Science NER Benchmark — Implemented PEFT/LoRA-based evaluation of SciBERT, MatSciBERT, and MATBERT across eight domain datasets; demonstrated strong cross-paper generalization.

PUBLICATIONS

LIMP: Linguistically-Informed Multi-Strategy Prompting for Telugu Multi-Turn Dialogue Generation — Arjungopal Anilkumar, Suryansh Ram Menon. *Proceedings of the Sixth Workshop on Speech, Vision, and Language Technologies for Dravidian Languages*, pp. 32–41, Jul 2026. aclanthology.org/2026.dravidianlangtech-1.5

- Accepted for Oral Presentation at the workshop.
- Introduced an inference-time, training-free prompting framework injecting linguistic knowledge (honorific morphology, SOV syntax) into LLMs, outperforming SARVAM-1.
- Achieved nearly **2×** higher morphosyntactic fidelity and near-ceiling semantic fidelity (BERTScore F1 = 0.9709) across **10,000** stratified IndicDialogue instances using a novel six-stage chain-of-thought strategy.

The ELITE Club

Coimbatore

Head of Event Management

Dec 2025 – Present

- Directed planning and logistics for major cultural and technical events, streamlining cross-team operational execution for large-scale campus audiences.

Youth United Council of India

Coimbatore

Campus Head; Event Management Team Member

Dec 2024 – Jun 2025

- Led a **10-member** student committee to execute high-impact campus events, managing scheduling and operations for **300+** participants.
- Managed logistics, scheduling, and operational support for events with more than **200** attendees.

Institution of Electronics and Telecommunication Engineers

Coimbatore

Event Management Team Member

Aug 2025 – Present

- Coordinated induction and onboarding programs for **100+** new members, improving participation and engagement.
